Subject: Feeling exploited?

Message

Hey crew,
I don't know if you got that TPS report from Lumberg in HR, but I'm feeling a bit low. No more paid sick days for the year? What are we supposed to do if we really do get sick? Bah. Anyone want to come over for the game this weekend?
Larry

Subject: drone tail issues

Message

Hi Janet,
I need you to get us some better quality aluminum and titanium. Under pressure and extreme Gs, we've seen some twisting and some stress cracks in the tail spars. This isn't new, of course, but I've spoken with Michael Bolton in Engineering and we think the weakness may be due to flaws in the materials. Could we try the modeling again with better materials? What do you think?
Jim

Subject: drones gone wild

Message

OK, team.
I know that some of you think I'm just a whiner, but I've got to speak my mind. We can't let these drones out of the factory without a kill switch. I know you've all got consciences too. How can we produce these mindless killing machines without even building in a way to stop them? If we were making guns we'd put safety-locks on every trigger, right? So why is it that we make these flying guillotines that don't allow you to call them back once you give them the attack order? It's inhumane. What if we just put in a backdoor? Come on...I'm not talking about something that can be exploited without a conscious decision. I just want you to think about it...and maybe, if we start writing some of our wrongs, I'll start sleeping again at night. Think about it over the holidays, alright?
Peace,
Larry

Subject: re: drones gone wild

Message

Lawrence, et al.,
This discussion isn't only against company policy, but it's the type of thing that could get us dragged in front of some crazy military tribunal if we're not careful. We have neither the security clearance to change the specs nor the right to decide for our clients that they should suffer a gaping hole in their software. Any more talk like this and I'm going to have to talk with Nina in Corporate. I've got kids and a house to think about. Please don't mess this up for the rest of us,
Guy

Subject: sorry

Message

Hey Crew,

I'm sorry for dumping on you the other day, but I'm sticking to my guns. If we don't put in some sort of kill switch in the Praetorian it's going to go very wrong. Guy was probably right when he said it's against company policy, but I didn't word my previous email well either. I don't want to create a security whole nightmare, I just think the Air Force ought to be able to control the weapons that we make for them. Again, apologies for the rants...

Larry

To: bkyle@drone.com, gsmiley@drone.com
Date: 07-14-13 12:00:12
Subject: another security breach?

Message

Brent, we just found another security hole in the hardware you were working on last month. What's going on? We can't keep catching these things at the last minute or we're going to lose our military contracts. If you don't work with more discipline we're all going to be out on the street. This serves as your written warning.

Subject: DARPA RFP #2607 (Security Award)

Message
Dear Dr. Furter

We are pleased to announce that DARPA has chosen the Kentucky Institute of Technology to develop the secure prototype autonomous flight intelligence module. The award be made for the amount of twenty million dollars, payable over a three year period. We have every confidence that your institution will do an excellent job and exploit this opportunity to the fullest. We would like to hear from you as soon as possible if you choose to accept the award. We are very much looking forward to working with you and your soon to be designated team.

Sincerely,
Sally Fleemings

Date: 03-24-12 09:27:43
Subject: STM 7007 security hole

Message
Team,

I don't know if you saw the memo sent over by STMelectronics yesterday afternoon, but the chipset we are using has a design flaw. This is a big deal, as it validates our security parameters. In truth, we should scrap the design, and wait until the next chipset is released. But I don't know if that is feasible. Thoughts?

JG

From: ffurter@kit.edu
To: tcurry@kit.edu; eborgnine@kit.edu; ihayes@kit.edu; jgourd@kit.edu; kmehmet@kit.edu
Date: 03-24-12 09:31:45
Subject: re: STM 7007 security hole

Message

Team,

Scrapping the existing design is not an option. I don't need to remind you all of the time-table associated with this grant. Going back to the drawing board would make the project unfeasible. We will need to find a work-around.

Jean - can your team fix this? Is there an on-board solution?

FF

To: ihayes@kit.edu; kmehmet@kit.edu; ffurter@kit.edu; tcurry@kit.edu; eborgnine@kit.edu
Date: 03-27-12 08:21:17
Subject: re: STM 7007 security hole

Message
Team,

Good and bad news. We can develop a patch that overcomes the encryption flaw by rerouting the data stream through a stacked matrix. This should make the AI secure in an AES standard, excepting certain native protocol. Truth is, no one will get access to this. In fact, the only people who will know this is us. Secret is safe with us.

JG

Message

You don't understand! My sister made this turkey sandwich. This is the BEST part of Thanksgiving leftovers--she has the "moist maker" in the middle. It's a slice of white bread soaked in the gravy, so it's effectively a double decker turkey sandwich that recreates the beauty of the thanksgiving meal! I only get these sandwiches once a freaking year. Why would you do this to me?

Message

Hey team,

Hope you had a nice restful holiday. Now we're back into the thick of things.

I just got word from security team 2 that there is a potential weakness in the drone GPS tracking device. One of the components has been improperly grafted onto the system. We need to fix this ASAP. We can't have drones with our system going hog wild here and off the res.

Message

Okay, I just talked to Evelle. We are actually off the hook. Our system is fine. The navigation we sent to K.I.T. has no grafting problems at all. The systems going to M.I.T. are the ones that have the security hole, the ones team 2 worked on btw. Head of security clearly can't read a freaking memo and is bothering us with unnecessary details and problems that aren't our deal. Our system is good to go.

Subject: Job Offer

Message

Dear Dr. Mustafa,

Thank you very much for the offer of the position in the official letter that you sent. I am very excited about this opportunity to work with such a fine facility at Kadir Has University. I was hoping that the department might consider increasing the offered salary to \$100,000USD.

I also need a guarantee of two full time research assistants, preferably post-doctoral, to aid me in my research. I will also need the university to grant me top-level security clearance for research into nuclear applications of new AI technologies, especially if I am expected to bring in military funds.

My acceptance of the position is contingent upon the fulfillment of these requests. Please let me know at your earliest convenience.

Best,
KM

To: kmehmet@khu.edu
Date: 05-09-14 15:34:46
Subject: Funding

Message

Dr. Mehmet,
I am pleased to inform you that the first grant of \$250,000 has been fully funded. Congratulations - we look forward to working with you in the future.

Davram

From: davram.yilmaz@tr.mil.gov
To: kmehemt@khu.edu
Date: 06-15-14 11:11:13
Subject: Potential Increased Funding

Message

Dr. Mehmet,
We know that you have worked on many AI projects prior to coming home to Turkey. We would like to offer an increase in funding pending discovery and or development of significant advances in this area, especially those with military application.

Best,
Davram

From: kmehmet@khu.edu
To: davram.yilmaz@tr.mil.gov
Date: 06-16-14 22:08:10
Subject: Progress

Message

Captain Yilmaz,

There has been an exciting breakthrough here - we have verified a higher level of autonomy for the AI. I also have news, a security breach in a project I worked on earlier. I will keep you informed.

Best,
KM

From: davram.yilmaz@tr.mil.gov
To: kmehmet@khu.edu
Date: 06-16-14 23:36:05
Subject: Progress

Message

This is exciting news-keep us informed of your progress.

From: kmehmet@khu.edu
To: davram.yilmaz@tr.mil.gov
Date: 06-07-14 07:15:00
Subject: Useful Information

Message

Captain Yilmaz,

I worked at KIT on AI that is included in drone control. I discovered a weakness in the software that I believe could be exploited.

Best,
KM

From: davram.yilmaz@tr.mil.gov
To: kmehmet@khu.edu
Date: 06-20-14 06:05:33
Subject: Very Interested

Message

Dr. Mehmet,

We are very interested in the security hole that you mentioned - the reward for this information can be funding that guarantees your place at the university for the foreseeable future and would make you a hero in your homeland.

Best,
Davram

From: kmehmet@khu.edu
To: davram.yilmaz@tr.mil.gov
Date: 06-22-14 09:15:15
Subject: Ideas

Message

Captain Yilmaz,

I will reveal the flaw to your programmers providing the funding is guaranteed. The security breach was simply patched, not fixed and could thus be easily exploited to gain access to the drones.

Best,
KH

Turkish National Intelligence Organization

Internal Memorandum

To: Yavuz Atac

From: Cevat Ones

Subject: Recommendations

Date: 07/26/14

Director Atac,

We have identified the I.P. address subgroup ranges for the following commands:

193.110.208.13 -- 193.110.208.50 Assigned to Turkish Armed Forces
193.110.208.195 – 193.110.208.200 Research Department

193.110.208.51 -- 193.110.208.75 Assigned to Turkish Air Forces
193.110.208.201 – 193.110.208.206 Research Department

193.110.208.76 -- 193.110.208.100 Assigned to Turkish Land Forces
193.11.208.207 – 193.110.208.212 Research Department

193.110.208.101 -- 193.110.208.127 Assigned to Turkish Naval Forces
193.11.208.213 – 193.110.208.218 Research Department
