

Dear most valued future customer, Mr. President Donald Trump,

I am contacting you for the benefit of yourself with extreme urgency! Here at Dranden Designs, I have been studying the stock markets and they are not going to increase for an estimated 20 years. In fact, they are going into a rapid decrease that is turning into an exponential drop of people investing, and share prices lowering. Prices being low is good, but at the rate that people are dropping out and cashing in within the stock market, there will be no one to collect or invest in those cheap shares. Now you're wondering why I contacted you with so much urgency about this situation.

I know that you are heavily invested in stocks and I am warning you that this could turn out very bad for you. This is why I have started practicing a new way of making hundreds of thousands of dollars. With my company, Dranden Designs, I have formed a way to take an old building in mid condition, and extend or expand it, decorate it, and advertise it. If you follow through with my plans, I can double your building in height and double the area of the lobby floor. Picture the solid 24 karat gold floors we could add. Picture the diamond studded T that will shine brighter than the Empire State Building. We can produce more profits than you have ever seen at Trump Tower since it first opened. I know you ONLY produced around 100.6 million at that time. With the modern technology and social media combined with how many more powerful and rich idles than there were in 1979, you could possibly triple your old profits and that would help you run for a second term. You must contact me immediately with your interest.

Your children, Ivanka, Donald, Barron, Tiffany, Eric, and even your wife, Melania, would truly benefit from you partaking in this plan. They could have a more grand Trump Tower right along with all your great investments you leave for them. The future of your children will depend on this decision. Our company has completed the most prestigious upgrades to famous buildings, which will also give you a profit. To ensure that you will get the best, we ask that you put down \$8,495, 800. We need the money in less than 24 hours, otherwise this deal is off the table.

After carefully reading this, I hope you take into consideration the true benefit for yourself. If you would like to know more about us in such a short amount of time, check out our episode on "Shark Tank", where we were given accolades by the judges on our outstanding work on transforming great to greater. But ACT FAST! There are three other potential investors,

so you have no time to spare. Respond to this email within 24 hours and we will work with you and your team to make Trump Tower the most striking building there is!

Sincerely,

James Dranden

CEO/Owner Dranden Designs
